PATHOGENS REMOVAL SPECIALISTS

TRUSTED PEST MANAGEMENT **DISINFECTANT & PROTECTANT TREATMENT** DISINFECTS & PROTECTS FOR UP TO 30 DAYS

Trusted's Disinfectant & Protectant Treatment is a simple and effective way to kill bacteria and protect surfaces for up to 30 days*. Killing 99.99% of PATHOGENS that invade your home or workplace, it is also designed to eliminate viruses within 5 minutes.

It eliminates odour-causing bacteria and inhibits mould and mildew. Trusted Pest Management products will also coat the surface with a microscopic protective layer for continuous protection. It is ideal for use around children, pets and plants.

PATHOGENS REMOVAL SPECIALISTS

TRUSTED PEST MANAGEMENT DISINFECTANT & PROTECTANT TREATMENT DISINFECTS & PROTECTS FOR UP TO 30 DAYS

KILLS 99.99 OF PATHOGENS

Trusted Pest Management DISINFECTANT & PROTECTANT treatment is a broad spectrum commercial grade surface disinfectant that kills > 99.99% of bacteria, and forms a long lasting, invisible barrier which defends surfaces against microbial attack (and biofilm formation), continually for up to 30 days.

BONDS TO SURFACES

Trusted Pest Management DISINFECTANT & PROTECTANT treatment is applied wet onto clean dry surfaces. As it dries, it forms an organo silane matrix of electrostatically charged spikes that bond to a diverse range of surfaces and substrates. Unlike all non-bound disinfectants, Trusted Pest Management DISINFECTANT & PROTECTANT treatment does not leach from (or leave) the treated surface, it does not deplete in microbial efficacy, and creates a field of inhibition to promote microbial resistance.

NON-STOP PROTECTION

Through a bio mechanical process, the electrostatic charge interacts with the bacteria lipid layer, resulting in permanent destruction of the bacterial cell. Because the organo silane isn't consumed in the disinfection process, it remains ready to continually defend treated surfaces against contamination and bio film formation.

BROAD SPECTRUM

Trusted Pest Management DISINFECTANT & PROTECTANT treatment Disinfectant has been tested against a wide range of pathogens including Legionella, E. Coli, Pseudomonas, Staphylococcus aureus, Enterococcus Hirare, Salmonella and Aspergillus Niger. Trusted Pest Management DISINFECTANT & PROTECTANT meets or exceeds EN1276 and AOAC 991.47 /48/49 hard surface carrier test.

HUMAN FRIENDLY/ ECO FRIENDLY

Trusted Pest Management DISINFECTANT & PROTECTANT treatment is the smarter clean, being convenient to use, sustainable, non-leaching, long lasting and above all, friendly to humans, pets and plants. Trusted Pest Management DISINFECTANT & PROTECTANT treatment contains no chlorines, bleaches, carcinogenic or endocrine disruptive compounds and in final life, Trusted Pest Management DISINFECTANT & PROTECTANT treatment breaks down to form harmless organic compounds.
